DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 14 and 24-25 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 11-158,138.

The reference discloses a liquid crystal composition comprising a compound represented by the formula (I), which anticipated the claimed invention.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-13 and 15-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 9-157654 in view of JP 11-158138.

The reference (JP 9-157654) differs from the claims in that the claims exclude the compound of the formula I and used in IPS display device. The liquid crystal compounds shown in Examples 3-3 of JP 9-157654 are corresponding to the compounds of the

present formulae II, III and V. The compounds of Examples 3-5 are corresponding to the compounds of the present formulae II, III and IV. The concentration ranges are well within the present invention. The liquid crystal properties (such as birefringence, flow viscosity, resistivity and clearing point) for these two examples are similar to the present invention except the rotational viscosity. However, the compound of formula I in the present claim is disclosed by JP 11-158138, which has similar chemical structure and properties of the compound of JP 9-157654. Also, JP 9-157654 teaches that the liquid crystal compositions depend on their properties can be used as components for IPS (in-plane switching), ECB (birefringence control), GH (guest-host) mode, TN (twisted nematic), STN (super-twisted nematic) and AM (active nematic). Because the compound of JP 11-158138 and JP 9-157654 has similar chemical structure, it would have been obvious to those skilled in the art to take advantage of the reference compositions having unique liquid crystal properties (JP 9-157654) and substitute the compound of JP 11-158138 for JP 9-157654 to arrive at the claimed invention.

Response to Arguments

5. Applicant's arguments with respect to claims 1-25 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 1756

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
